

It has been said,why pay for something that you can get for free! Well I was at the point that I hardly ever turned my radio on anymore, because there was nothing on that I could listen to. I paid for xm radio and I think it is the best thing since power steering. It helps me fight fatigue with it,s wide variety of entertainment. And since they have come up with the instant traffic and weather report. It is better yet. Although it had only been up for a short time ,it has helped me alot already . By avoiding trouble spots,Not only have it saved me valuable time . I did not end up part of the problem. Please don,t let the big boys(NAB) have a monopoly in this. Please do not support petition 04-160

THANK YOU
